End of classic process

Part payments & banking system

Special case where the “*Wayfair Sale tax*” applied on consumption will be refunded like in VAT environment for companies and too for an ultimate consumer who have weak revenues.

This possibility show that, without any modification, there is no difference in the DAGTVA taxation system used between businesses and the ultimate consumer to include them with the same advantages seen in a VAT environment.

This new tax system open the way for an economic integration for them and gives a mandatory access to the banking system for these poor persons.
